

RHS PATIENT ENGAGEMENT Platform

INTEGRATED

- Chronic Care Support
- Fitness/Wellness Support
- Traditional Health
- Behavioral Care
- Remote Physician Care - 24/7

THE SOLUTION

RHS innovation was developed with the belief that industry reform will come ONLY as a result of the patient's participation, as a co-partner, in dictating his own health trajectory. Patient empowerment begins with the granting of tools that facilitates engagement and education of the patients' evolving health and wellness status.

RHS provides an online Patient Engagement Platform designed to assist in a patients' quality and continuum of care through its Best of Breed solutions. From their home computer or mobile device, they are granted 24/7 access patient-facing remote physicians, his/her medical history, physicians notes, emergency information and updated health/fitness indicators i.e. heart rate, blood sugars, blood pressure and an interactive Behavioral Health component.

RHS allows real-time interaction and graphic feedback of patients health status including chronic care illnesses, fitness and wellness status, behavioral health mood indicators, medication adherence and effectiveness.

TECHNICAL DESCRIPTION

The Patient Engagement Platform is a Web based Multi-tenant SaaS application designed to provide:

- High Availability
- High Content throughput
- Audio/Video optimized to require low bandwidth
- Easy integration through secure API Endpoints
- User Interface Customization

The user interface follows Google's Material Design principles that provide a responsive web interface. This allows for a user's optimal viewing and interaction experience on any web enabled device.

ABOUT RESPONSIVE HEALTHCARE SOLUTIONS

Responsive Healthcare Solutions (*RHS*) specializes in bringing to market best-of-breed healthcare technologies that cover the entire lifecycle of the care process with a specific focus on the patient's needs, education and engagement in their healthcare journey. Founded in 2015 in Orem Utah, *RHS* is led by solution-oriented visionaries with a focus on the growing Healthcare segment. The *RHS* team couples savvy technologists with experienced Healthcare professionals to drive innovation across the breadth of the industry.
